Good Unique design Quality 120Hz display Good battery life and fast charging 3.5mm headphone jack			Bad No stereo speakers No IP rating Average low-light camera performance Too many preloaded apps

It has a high-quality Super AMOLED display, a new processor, and a battery that charges up from zero to 100 percent in about 35 minutes. It's got slightly better hardware than the OnePlus Nord 2, so it might be an interesting alternative within the same price segment. Then, there's the recently launched Motorola Edge 20, which is priced a few thousand Rupees higher, but offers a lot more in terms of hardware plus near-stock software, in a slim and sleek package. The GT Master Edition is the most affordable of these three, but will that give it enough of an edge?

GT master edition real user review

Himanshu Rawat (Feb 22, 2022) on Gadgets 360

Not worth buying,very poor performance and quality,only 2 months old and I am getting battery sign network sign and other marks on screen while watching other videos or anything.I have thrown my money in shithole.Dont buy this phone because of design or processor because the processor is not giving u 60 fps frame rate in pubg lite at any graphic settings.While u get those settings and better experience and performance on other phones at this price range even at low price range.I m strongly advised u to not buy this phone otherwise u wil be sorry like me.
